Dear Hiring Team,

I am writing to express my enthusiastic interest in the Developer position at your company. As a recent graduate of the NuCamp Coding Academy with a focus on Web Development and Responsive Web Design, and with experience in developing and maintaining client-side web applications, I am eager to apply my skills and passion to a growing team. My recent training at NuCamp provided me with a strong foundation in modern web development technologies, including JavaScript (ES6+), HTML5, CSS3, React, and Node.js. Through hands-on projects, such as building a personal portfolio website, mobile app and full-stack e-commerce application, I have gained practical experience in designing, developing, and implementing web solutions. These projects allowed me to hone my skills in front-end and back-end development, problem-solving, and collaborative coding. In my previous role at Avalanche Media, I was responsible for developing and maintaining client-side web applications. This experience provided me with valuable exposure to the development life cycle and reinforced my ability to work effectively in a client-focused environment. Additionally, my experience as a Production Manager at Ackley Media Group honed my skills in communication, attention to detail, and managing multiple tasks simultaneously – all crucial for a successful developer. I am particularly drawn to your company because of the great opportunity it presents to apply my acquired skills and expertise. I am confident that my technical skills, combined with my strong work ethic and dedication to continuous learning, make me a valuable asset to your team. Thank you for considering my application. I have attached my resume for your review and welcome the opportunity to discuss my qualifications further.

Sincerely,
Gregory Hodge
